PROFESSIONAL SUMMARY

Senior backend engineering professional with 15+ years of experience designing, building, and optimizing high-traffic systems serving millions of users. Strong expertise in backend architecture, scalable API development, system performance optimization, and technical leadership. Proven track record of delivering resilient solutions, improving application performance, mentoring engineers, and driving engineering excellence within Agile product environments. Hands-on experience with PHP, Node.js, Python, AWS, MySQL, MongoDB, Microservices, and REST APIs. Currently open to Staff Engineer, Lead Backend Engineer, PHP Team Lead, Technical Lead, and Lead Software Engineer opportunities.

CORE SKILLS

- Backend Architecture & System Design
- Scalable API & Microservices Architecture
- Backend Performance Optimization
- Database Design & Query Optimization
- PHP Technical Leadership
- Technical Mentoring & Code Reviews
- Production Stability & Troubleshooting
- Cross-Functional Technical Collaboration

TECHNICAL SKILLS

Languages: PHP, Node.js, Python, JavaScript, TypeScript

Frameworks: Laravel, Express.js

Architecture: Microservices, REST APIs, GraphQL

Cloud: AWS (SDK Integration, Cloud Concepts)

Databases: MySQL, MongoDB

Tools & Exposure: Docker, Kubernetes (Self-learning)

Practices: Agile, CI/CD, High Availability Design

PROJECTS

AI Image Detector

Project URL: <https://praveen-ai-image-detector.streamlit.app/>

A Python-based web application that analyzes images to determine whether they are AI-generated or real photographs using multiple detection techniques.

Key Features:

- Image upload via local system and URL input
- AI-based classification using CLIP model with text prompts
- Metadata (EXIF) analysis for camera and software trace detection
- Error Level Analysis (ELA) for identifying compression inconsistencies
- Combined verdict system with confidence scoring
- Interactive and user-friendly UI built using Streamlit

Tech Stack:

Python, Streamlit, Transformers (CLIP), PyTorch, Pillow, OpenCV, NumPy, Matplotlib

PROJECTS

AI Resume Skill Extractor & Job Matcher

Project URL: <https://praveen-ai-resume-job-matcher.streamlit.app/>

A Python-based Streamlit application that extracts skills from resumes and compares them with job descriptions to generate a match score and skill gap insights.

Key Features:

- Resume upload with PDF and DOCX support
- Text extraction using PyMuPDF, pdfplumber, and python-docx
- Skill extraction via keyword matching and optional Named Entity Recognition (spaCy)
- Job description comparison for relevance analysis
- Match scoring with percentage and missing skill recommendations
- Clean and intuitive UI built using Streamlit

Tech Stack:

Python, Streamlit, PyMuPDF, pdfplumber, python-docx, spaCy, NumPy

PROFESSIONAL EXPERIENCE

Senior Project Lead

Aug 2019 – Sep 2024

Matrimony.com Limited — Chennai, India

Provided technical leadership and backend architecture for high-traffic platform modules supporting millions of users, driving scalable solution design and engineering excellence.

- Mentored engineers through design discussions, code reviews, technical guidance, and problem-solving while contributing hands-on to critical backend initiatives.
- Collaborated with engineering teams to decompose complex technical initiatives into deliverable components while ensuring maintainable and scalable implementations.
- Participated in technical interviews and contributed to maintaining high engineering standards through candidate evaluation.
- Provided technical mentoring and troubleshooting support for developers
- Worked closely with product, QA, and infrastructure teams to deliver reliable production releases and resolve cross-functional technical challenges.
- Identified architectural bottlenecks, technical risks, and optimization opportunities to improve system reliability and scalability.

Key Engineering Contributions:

- Improved backend performance by approximately 30% through API optimization, database tuning, and query analysis.
- Designed and implemented scalable backend services for authentication and media workflows supporting large user volumes.
- Implemented reusable components improving development efficiency
- Contributed to production stability through deployment support, incident troubleshooting, and proactive reliability improvements.

Technologies: PHP, Node.js, Python, AWS, MySQL, MongoDB, Microservices, REST APIs, Agile

PROFESSIONAL EXPERIENCE

Senior Web Developer

Jul 2018 – Aug 2019

Innoblitz Technologies — Chennai, India

- Delivered backend feature enhancements improving delivery efficiency by 20%
- Optimized database queries improving response performance by 40%
- Collaborated with product and QA teams for feature rollout and defect resolution

Lead Web Developer

Jun 2015 – Jul 2018

Times Partner Services Pvt Ltd — Chennai, India

- Led backend development for enterprise web applications
- Maintained 99.9% system uptime through performance and stability improvements
- Reduced development cycle time by 15% through reusable service components

Earlier Experience

Web Developer – Dot Infotech (2012 – 2015)

Web Developer – Cubro Soft (2009 – 2012)

Delivered web application modules, improved database performance, and supported full development lifecycle.

EDUCATION

Master of Science – Information Technology

University of Madras, Chennai

Bachelor of Computer Applications

D.G. Vaishnav College, Chennai

CERTIFICATIONS & CONTINUOUS LEARNING

- AWS Certified Solutions Architect Associate (Udemy), Feb 2026 (Training & Preparation)
- AI Engineer Core Track: LLM Engineering, RAG, QLoRA, Agents (Udemy), Sep 2025
- Machine Learning, Data Science & AI Engineering with Python (Udemy), Apr 2025
- NodeJS - The Complete Guide (MVC, REST APIs, GraphQL, Deno) (Udemy), Nov 2024
- Laravel - For Beginner to Advanced (Udemy), Nov 2024

PROFESSIONAL DEVELOPMENT & INTERESTS

- Cloud-Native Architecture
- AI/ML & Large Language Model Applications
- Backend Engineering Best Practices
- Backend Performance Engineering
- Modern Python Frameworks (Django, Flask, FastAPI)

ADDITIONAL INFORMATION

- Open to Staff Engineer, Lead Backend Engineer, Technical Lead, PHP Team Lead, and Lead Software Engineer opportunities.
- Strong experience in product-based engineering environments
- Available for immediate opportunities
