PROFESSIONAL SUMMARY

Senior Backend Engineering Leader with 15+ years of experience building and scaling high-traffic backend systems, including 5 years of technical leadership in product-based organizations. Deep expertise in PHP (15 years) with hands-on experience in Node.js (3 years) and Python (3 years). Proven track record of designing scalable backend architectures, developing REST and GraphQL APIs, optimizing application performance, mentoring engineering teams, and delivering reliable software serving millions of users. Experienced with Laravel, Node.js, Python, MySQL, MongoDB, Redis, AWS, Microservices, and Agile development. Seeking Staff Engineer, Lead Backend Engineer, PHP Team Lead, Technical Lead, or Lead Software Engineer opportunities.

TECHNICAL EXPERTISE

- **Backend:** PHP, Laravel, Node.js, Python
- **Architecture:** System Design, Scalable Systems, REST APIs, GraphQL, Microservices
- **Databases:** MySQL, MongoDB, Redis
- **Cloud:** AWS, Docker
- **Engineering:** Performance Optimization, CI/CD, Agile
- **Leadership:** Technical Leadership, Mentoring, Code Reviews, Cross-functional Collaboration

TECHNICAL PROJECTS

AI Image Detector

Project URL: <https://praveen-ai-image-detector.streamlit.app/>

Built a Streamlit application to classify AI-generated and real images.

Implemented image analysis using CLIP, EXIF metadata, and Error Level Analysis (ELA).

Tech: Python, Streamlit, PyTorch, OpenCV

AI Resume Skill Extractor & Job Matcher

Project URL: <https://praveen-ai-resume-job-matcher.streamlit.app/>

Built a Streamlit application to extract resume skills and compare them with job descriptions.

Implemented resume parsing, skill matching, and job match scoring with gap analysis.

Tech: Python, Streamlit, spaCy, PyMuPDF, NumPy

PROFESSIONAL EXPERIENCE

Senior Project Lead

Aug 2019 – Sep 2024

Matrimony.com Limited — Chennai, India

- Provided technical leadership for backend systems supporting millions of users, driving scalable architecture and engineering best practices.
- Led backend development while mentoring engineers through technical design discussions, code reviews, troubleshooting, and hands-on development.
- Collaborated with Product, QA, and Infrastructure teams to deliver scalable, reliable, and maintainable backend solutions.
- Participated in technical interviews and contributed to maintaining high engineering standards.

Key Engineering Contributions:

- Improved backend performance by approximately 30% through API optimization, MySQL query tuning, and Redis caching.
- Designed and developed scalable backend services for authentication and photo management modules supporting millions of users.
- Contributed to the migration of authentication and photo management modules from PHP to Node.js using GraphQL APIs.
- Developed reusable backend components to improve development efficiency and code consistency.
- Contributed to production stability through deployment support, incident troubleshooting, and performance optimization.
- Identified architectural bottlenecks and implemented scalable solutions to improve system reliability and maintainability.

Technologies: PHP, Laravel, Node.js, Python, GraphQL, REST APIs, MySQL, MongoDB, Redis, AWS, Microservices, Agile

Senior Web Developer

Jul 2018 – Aug 2019

Innoblitz Technologies — Chennai, India

- Delivered backend feature enhancements improving delivery efficiency by 20%
- Optimized database queries improving response performance by 40%
- Collaborated with product and QA teams for feature rollout and defect resolution

Lead Web Developer

Jun 2015 – Jul 2018

Times Partner Services Pvt Ltd — Chennai, India

- Led backend development for enterprise web applications
- Maintained 99.9% system uptime through performance and stability improvements
- Reduced development cycle time by 15% through reusable service components

Earlier Experience

Web Developer – Dot Infotech (Aug 2012 – May 2015)

Web Developer – Cubro Soft (Dec 2009 – Aug 2012)

Delivered web application modules, improved database performance, and supported full development lifecycle.

EDUCATION

Master of Science – Information Technology

University of Madras, Chennai

Bachelor of Computer Applications

D.G. Vaishnav College, Chennai

CERTIFICATIONS & CONTINUOUS LEARNING

- Laravel - For Beginner to Advanced (Udemy), Nov 2024
- NodeJS - The Complete Guide (MVC, REST APIs, GraphQL, Deno) (Udemy), Nov 2024
- Machine Learning, Data Science & AI Engineering with Python (Udemy), Apr 2025
- AI Engineer Core Track: LLM Engineering, RAG, QLoRA, Agents (Udemy), Sep 2025
- AWS Certified Solutions Architect Associate (Udemy), Feb 2026 (Training & Preparation)
